Subject: Get it done!

Justice delayed is justice denied. Microsoft was denied presenting any evidence before the court ..that's not justice. Having the judge making public comment while the case is in progress. That's not justice. Asking competitors to set penalties. That's not justice.

How pathetic does it get?

Even more pathetic as this bunch of has been envious companies hate Microsoft so much that in a bid to line their own pockets with their ill gotten gain they will even go so far as to deny American school kids computers.

Is not about justice is it. It's just plain envy and hate of a rich but generous man who gave \$17B to charity last year.

YOU HAVE NO SHAME!!

Thank you
